Summary

Results-oriented Computer Science undergraduate with hands-on experience in frontend web development and a strong foundation in Java, Python, SQL, Data Structures and Algorithms, Object-Oriented Programming, DBMS, and Operating Systems. Completed a Power BI internship and developed projects including an AI chatbot, personal portfolio website, and calculator. Strong analytical and problem-solving abilities with a commitment to continuous learning and delivering high-quality software solutions.

Skills

Programming Languages: Java,Python, SQL, HTML, CSS, JavaScript
Databases: MySQL,MongoDB
Developer Tools: Git, GitHub,VS code,IntelliJ IDEA,
Core Concepts: Java, Python, DBMS, Operating System, Computer Networks.

Projects

Expense Tracker — React, TypeScript, Node.js, Express.js, PostgreSQL **2026**

- Developed a full-stack Expense Tracker application using React, TypeScript, Node.js, Express.js, and PostgreSQL.
- Implemented expense management features including adding, editing, deleting, categorizing, and tracking financial transactions.
- Built REST APIs and database integration using Express.js, Drizzle ORM, and PostgreSQL for persistent expense data management.
- Integrated Clerk authentication and designed a responsive dashboard for secure user access and expense analysis.

Calculator Web Application — HTML, CSS, JavaScript (Frontend) **2026**

- Developed a fully functional calculator capable of performing basic arithmetic operations.
- Implemented interactive button handling and expression evaluation using JavaScript.
- Designed a responsive and intuitive user interface with clean styling
- Strengthened understanding of JavaScript functions, event handling, and DOM manipulation.

Achievements & Certifications

- **Power BI Internship Completion Certificate** – Successfully completed a Power BI internship, gaining practical experience in data visualization, dashboard creation, data analysis, and business intelligence reporting using Microsoft Power BI.
- **Achievements** – Solved 100+ Data Structures and Algorithms (DSA) problems on coding platforms. Earned 5-Star badges in Java and Python on HackerRank. Solved 100+ LeetCode problems, strengthening problem-solving and algorithmic thinking skills.

Education

B.Tech - CSE(Artificial Intelligence)

Pragati Engineering College

CGPA : 8.17

2024 — 2028
